

## We are proud to announce the extended cooperation with Renesas / Intersil for the Rad Hard / HighRel Components in Europe

Intersil, a wholly owned subsidiary of Renesas Electronics Corporation, is a leading provider of innovative power management and precision analog solutions. The company's products form the building blocks of increasingly intelligent, mobile and power hungry electronics enabling advances in power management to improve efficiency and extend battery life. With a deep portfolio of intellectual property and a rich history of design and process innovation, Intersil is the trusted partner to leading companies in some of the world's largest markets, including the industrial and infrastructure, mobile computing, automotive and aerospace.

Protec GmbH was responsible for DACH, NORDIC and the UK in the past years. Due to our success, excellent support and dedication to the HighRel and Space markets we have been assigned as the Pan European Sales Representative for all Space components within Renesas Intersil. As such all countries like Italy, France, Spain, Belgium, Netherlands, Portugal and Luxembourg have been added to our responsibilities. As usual we will support your technical and commercial needs.

All Intersil RadHard enquiries will be supported by our Inside Sales Team Martina Maske ([m.maske@protec-semi.com](mailto:m.maske@protec-semi.com)) and Harald Steiner ([h.steiner@protec-semi.com](mailto:h.steiner@protec-semi.com)) and the respective Regional Sales as seen below.
